

Leonardo Martins Macedo

Software Engineer | Full-Stack Developer

Belo Horizonte, MG, Brazil | +55 (31) 98745-1563 | leo.euricobete@gmail.com

Portfolio: leomartinsdev.me | linkedin.com/in/leonardo-martins-macedo-036969401 | github.com/leonardoMartins-Dev

SUMMARY

Second-semester Software Engineering student at PUC Minas and Full Stack developer, Back-end in Java and Spring Boot | Front-end in React and Vite. Built and deployed WaveHub (an app for listening to radio from around the world), along with other projects. Seeking an internship to contribute to real-world projects, grow my knowledge, and put it into practice.

EDUCATION

Bachelor's Degree in Software Engineering — PUC Minas

Feb 2026 – Dec 2029 (expected)

Pontifical Catholic University of Minas Gerais · Coração Eucarístico Campus · Currently in 2nd semester

Relevant coursework: Modular Programming (Java and OOP), Web Application Development and Integration, Introduction to Algorithms (Python), Software Engineering Fundamentals, Human-Computer Interaction.

Extracurricular: Dev_Labs Workshop (PUC Minas) — projects with Spring Boot and web scraping with Python (Scrapy).

High School Diploma — Colégio Santo Agostinho

Contagem, MG · Completed

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS (Bootstrap)

Frameworks & Libraries: Spring Boot, Spring Security, Spring Web, Spring Data JPA, React, Thymeleaf, Scrapy

Tools: Git, GitHub, Maven, Vite, Docker, Postman, IntelliJ IDEA, VS Code

Databases: PostgreSQL (Supabase); currently learning SQLite and MongoDB (NoSQL)

Concepts: OOP, layered architecture (MVC), authentication and authorization, REST APIs, web scraping

PROJECTS

WaveHub — Live Radio

wavehub-fhec.onrender.com | github.com/leonardoMartins-Dev/WaveHub

Java 17 · Spring Boot 3 · Spring Security · Spring Data JPA · PostgreSQL (Supabase) · Docker — deployed on Render

- Built and deployed a web app for streaming radio stations from any country, integrating the Radio Browser API and WeatherAPI, with country and state filters, name search, and the local weather and time.
- Modeled users and per-user favorites in PostgreSQL (Supabase) with Spring Data JPA; secured login with Spring Security, BCrypt, CSRF, and server-side reCAPTCHA validation, and enabled Row Level Security on the tables.
- Reduced external calls with caching (@Cacheable; weather cached for 10 min with a 3 s timeout) and built a single audio player and no-reload favoriting (fetch with CSRF token), so playback is never interrupted.

MedVita — Hospital Management System

github.com/leonardoMartins-Dev/Sistema_Hospitalar

Java 17 · Spring Boot 3 · Spring Security · Thymeleaf · Spring Mail — Modular Programming course project (in progress)

- Implemented authentication and authorization with Spring Security for 3 roles (administrator, doctor, and patient), with protected routes and role-based redirects after login.
- Built email-based password recovery with a UUID token that expires after 15 minutes, a custom reCAPTCHA filter that runs before authentication, and centralized error handling with @ControllerAdvice.

TSE 2026 Candidates (MG)

github.com/leonardoMartins-Dev/SpringBoot

Java · Spring Boot · OpenCSV · Thymeleaf

- Processed the TSE's official open-data CSV (50 columns, ISO-8859-1 encoding) and displayed the 1,832 candidacies in Minas Gerais from 29 parties, with photo, ballot number, and party.
- Implemented combinable filters by office, party, and free text using Java Streams, and handled a data inconsistency (masked CPF, Brazil's taxpayer ID) by matching candidate name and number to retrieve photos.

Integration REST APIs — ClimaAPI and FipeAPI

github.com/leonardoMartins-Dev/API-s-REST

Java · Spring Boot · Spring Web (RestTemplate) · Maven

- Developed REST APIs that consume WeatherAPI and the FIPE Table (Brazil's vehicle price reference) and expose custom endpoints for weather by city and vehicle data, with the API key secured in an environment variable.

PROFESSIONAL EXPERIENCE

Administrative and Operations Assistant — Restaurante Tropeiro da Tia Bete · Belo Horizonte, MG Jan 2026 – Present

- Set up and manage the restaurant's delivery channels on the iFood and 99Food platforms.
- Manage the restaurant's social media and operate the cash register, organizing the customer service flow.

LANGUAGES

Portuguese: native | **English:** intermediate (advanced technical reading; developing conversational skills)
